National Sea Grant Law Center

This month marks the 80th anniversary of the passage of the National Sea Grant Act, which establishes the National Sea Grant College Program to support marine sciences education and research. The program has grown from a few programs in the early days to over 30 centers and more than 1,000 university-based and non-profit partnerships across the country. The program has played a critical role in advancing marine science and technology, fostering innovation, and supporting outreach to the public.

Louisiana Sea Grant and Policy Program

The Louisiana Sea Grant College Program is celebrating its 50th anniversary this year. The program is dedicated to improving the quality of life for Louisianans and the coastal environment through research, extension, and education. The program focuses on issues such as coastal resiliency, sustainable fisheries, and marine science education. The program has also played a key role in the state’s response to the 2010 BP oil spill in the Gulf of Mexico.

Mississippi-Alabama Sea Grant Program

The Mississippi-Alabama Sea Grant College Program is dedicated to improving the quality of marine and coastal environments for the benefit of Mississippians and Alabamians. The program focuses on issues such as coastal resiliency, sustainable fisheries, and marine science education. The program has also played a key role in the state’s response to the 2010 BP oil spill in the Gulf of Mexico.

North Carolina Coastal Resources Management

The North Carolina Coastal Resources Management Program is dedicated to improving the quality of life for North Carolinians and the coastal environment through research, extension, and education. The program focuses on issues such as coastal resiliency, sustainable fisheries, and marine science education. The program has also played a key role in the state’s response to the 2010 BP oil spill in the Gulf of Mexico.

National Sea Grant College Program

The National Sea Grant College Program is a Marine, Estuarine, and Great Lakes Research Institute that supports marine sciences education and research. The program has grown from a few programs in the early days to over 30 centers and more than 1,000 university-based and non-profit partnerships across the country. The program has played a critical role in advancing marine science and technology, fostering innovation, and supporting outreach to the public.

Sea Grant Law and Policy Project

The Sea Grant Law and Policy Project is dedicated to improving the quality of marine and coastal environments for the benefit of Louisianans and the coastal environment through research, extension, and education. The project focuses on issues such as coastal resiliency, sustainable fisheries, and marine science education. The project has also played a key role in the state’s response to the 2010 BP oil spill in the Gulf of Mexico.
