Publications

Read the June 2026 issue of the *Ocean and Coastal Case Alert*! The Case Alert is a monthly newsletter highlighting recent court decisions impacting ocean and coastal resource management. This month's alert includes a summary of a U.S. Supreme Court opinion finding that a company could bring suit against four cruise lines for using docks that the Cuban government had seized from the company in the 1960s.

Streamlining Harmful Algal Bloom Control Permitting Using the New US HAB CTRL Website
(August 19, 2026 at 3pm EST)

Join us for a webinar to explore the new US HAB Control Technologies & Regulatory Logistics (US HAB CTRL) website. This innovative resource helps users navigate the permitting and application of harmful algal bloom control technologies. Dr. Amy Grogan, Dashboard Coordinator at the University of Maryland Center for Environmental Science, will demonstrate the website's key features and practical tools. Additionally, NSGLC Ocean and Coastal Law Fellow, Siena Fouse, will explain how US HAB CTRL helps users overcome the unique legal challenges of this novel permitting process. The webinar will be August 19, 2026 at 3pm EST.

Research

DinoSHIELD Case Study

Check out the NSGLC's case study recounting the obstacles navigated by a research team as they took on permitting a novel harmful algal bloom (HAB) control technology. The DinoSHIELD technology was developed by staff at the National Centers for Coastal Ocean Science (NCCOS), which is part of the National Oceanic and Atmospheric Administration (NOAA) and develops ecosystem science solutions and tools for sustainable stewardship of ocean and coastal resources. This case study was derived from interviews with the DinoSHIELD team members about their complicated experience.
